TILE REPLACE MOUNT

1
Remove tile to be replaced and locate rafter

2
Install sled over optional base flashing and drive lag screws to required embedment. Waterproof per all applicable codes and standards as required by the AHJ.

3
Slide replacement flashing under left and up-roof tiles, ensuring post hole lines up with the sled channel.

4
Insert post with T-bolt into sled channel. Once engaged, rotate post clockwise to tighten T-bolt. Install EPDM boot over post and snug to flashing.
