

Powerful flexibility

Five and 10 degree tilt options and single-base or double-base anchoring configurations to meet diverse project demands.

Quick-click speed

Click-in-place brackets and module clamps allow rapid, one-tool, one-person installation.

Max efficiency

Fewer SKUs, lightweight, superior corrosion resistance, nested shipping, racking coverage up to 70kW per pallet of bases, depending on module wattage.

Streamlined design

Three primary structural elements: base, brackets, and clamps (non-structural wind deflectors where required)

S-BASE covers all the bases

A simplified and fast PV racking mount for commercial flat roofs. Minimal parts, efficient packing, and a wide-footprint that reduces point loads and protects the existing roofing system. Brackets click in place. One tool for the entire install.

Strength

Long-side module clamping and support for high wind and snow loads

Balance

Integrated ballast platform with wind deflectors reduce point loading and ballast quantity

Code Compliant

ASCE 7-10, 7-16, 7-22

25-Year Warranty

Manufactured with advanced materials and coatings to outlast the roof itself
